LOVABLE COURSE

Exercise: Build Your First App

Now it's your turn. Pick an idea, write a prompt, build it in Lovable, and test it. Don't overthink it — the goal is to get comfortable with the process.

YOUR TASK

1. **Pick an idea**
   Choose a simple app from the next page, or come up with your own.
2. **Plan your prompt**
   Think about inputs, outputs, features, and colours. Use page 3 to plan.
3. **Build it in Lovable**
   Open Lovable, paste your prompt, make sure Build mode is selected, and press send.
4. **Test it**
   Fill in every input, click every button, and make sure it all works.
5. **Refine it**
   Try a follow-up prompt to improve something — change a colour, add a button, fix a layout.

TIPS FOR A GREAT FIRST PROMPT

- Be specific about inputs and outputs — tell Lovable exactly what fields and results you want.
- Include a colour theme — it makes a huge difference in how polished the result looks.
- Say "keep it simple and clean" — this stops Lovable from overcomplicating things.
- Discuss your idea with Claude or ChatGPT first to help you plan a better prompt.

10 App Ideas for Inspiration

Pick one of these, or use them as a starting point for your own idea. These ideas were generated using Claude — you can do the same to brainstorm your own app concepts.

1. **Tip Calculator** — Blue & white
   Enter a bill amount, number of people, and tip percentage. Shows how much each person pays.

2. **Pomodoro Timer** — Red & dark
   A work timer with 25-minute focus sessions and 5-minute breaks. Tracks sessions completed.

3. **Unit Converter** — Purple & white
   Convert km to miles, kg to pounds, Celsius to Fahrenheit, and litres to gallons.

4. **Daily Water Tracker** — Light blue & white
   Set a daily water goal. Click a button each time you drink. See a progress bar fill up.

5. **Password Generator** — Dark & green
   Choose length, uppercase, numbers, symbols. Generates a random password with a copy button.

6. **Flashcard Quiz** — Yellow & dark
   Create flashcards with question and answer. Flip to reveal. Track your score.

7. **Expense Splitter** — Green & white
   Enter expenses with amounts and people. Calculates who owes what to whom.

8. **Mood Journal** — Orange & cream
   Pick a mood emoji, write a note, save with today's date. Shows a simple history.

9. **Countdown Timer** — Dark & gradient
   Enter a future date and event name. Shows a live countdown in days, hours, minutes.

10. **Recipe Scaler** — Red & white
    Enter ingredients and serving size. Change servings and all amounts update automatically.

Plan Your Prompt

Fill this in before you open Lovable. Planning first always gives better results.

App Name

What do you want to call your app?

What does it do?

Describe your app in one or two sentences.

Inputs

What information does the user need to enter?

Outputs

What should the app show after the user submits?

Colour Theme

What colours do you want? (e.g. dark theme with blue accents)

Extra Details

Anything else? (e.g. keep it simple, add a reset button)

YOUR FINAL PROMPT

Combine everything above into one prompt. Copy this into Lovable and press send.
