Your Claude Code Starter Pack — what's inside & where to begin

You have 10 resources below. You don't need all of them at once. Follow the path.

Step 1 — Install & Launch

Day 1

Open First 30 Minutes Quick Start (PDF)
Follow steps 1-3: install Claude Code, launch in your project, learn 8 essential commands.

Step 2 — Set Up Your Project

Day 1

Unzip Starter Kit (ZIP) and read Starter Kit Guide (PDF)
Copy .claude/ folder to your project. Edit CLAUDE.md. You now have hooks, skills, and safety rails.

Step 3 — Keep by Your Side

Week 1

Print Cheat Sheet (PDF) and Commands Reference (PDF)
Stick them next to your monitor. Use them as daily reference until the commands become muscle memory.

Step 4 — Level Up

Week 2+

Browse Prompt Library (PDF) when you need inspiration for what to ask Claude.
Use Decision Flowchart (PDF) when you're not sure which extension type to use.

Step 5 — Interactive Tools

Anytime

Open CLAUDE.md Generator (HTML) to build a custom CLAUDE.md for any new project.
Open Cost Calculator (HTML) to figure out which plan (Pro $20 vs Max $100) fits your usage.

Step 6 — Explore the Ecosystem

Week 3+

Open Resource Map (PDF) to discover skills, plugins, MCP servers, and community repos.

What's in this pack (10 files)

1.	**First 30 Minutes Quick Start**	PDF	Install & launch guide (Mac + Windows)
