How to Use This Guide

This guide gives you **50 real projects** you can build using Claude Code — and you don't need to know how to code. Each project comes with a **ready-to-use prompt** you can copy and paste directly into Claude Code.

Step 1: Open Claude Code
Launch Claude Code in your terminal. If you haven't installed it yet, check your course materials for setup instructions.

Step 2: Pick a Project
Browse the 10 categories and choose a project that excites you. They range from simple tools to full websites.

Step 3: Copy the Prompt
Each project has a complete prompt in the grey box. Copy the entire prompt exactly as written.

Step 4: Paste & Run
Paste the prompt into Claude Code and press Enter. Claude Code will build the project for you step by step.

Step 5: Customize
Once it's built, ask Claude Code to change colors, add features, or adapt it to your specific needs.

Pro Tip: Make It Yours
These prompts are starting points. After Claude Code builds your project, you can say things like: "Change the color scheme to blue and white", "Add a dark mode toggle", or "Make the layout work better on mobile." Claude Code will modify the project for you instantly.

PERSONAL TOOLS

Personal Tools

01 Personal Budget Tracker

A simple web app that tracks your income and expenses with charts showing where your money goes each month.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build me a personal budget tracker as a single HTML file. It should let me add
income and expenses with categories (food, rent, transport, entertainment, other).
Show a pie chart of spending by category and a running balance. Store everything in
the browser so it persists. Use a clean, modern design with green (#00C896) accents.
```

02 Habit Tracker Dashboard

Track daily habits with a visual calendar grid. See your streaks at a glance and stay motivated with streak counters.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a habit tracker as a single HTML file. I want to add habits (like exercise,
reading, meditation) and check them off each day. Show a GitHub-style green grid
calendar for each habit, plus a streak counter. Make it visually satisfying with
animations when I check off a habit. Store data in browser storage.
```

03 Recipe Organizer

Save and organize your favorite recipes in a searchable, taggable collection you can access from any device.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build me a recipe organizer as a single HTML file. I want to add recipes with a
title, ingredients list, steps, cook time, and tags (breakfast, dinner, vegetarian,
quick, etc). Include a search bar that filters by name or tag. Make it look like a
clean cookbook with card-based layout. Store recipes in browser storage.
```

04 Daily Journal with Mood Tracking

Write daily entries and track your mood over time with a simple, private journaling tool.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a daily journal app as a single HTML file. Each entry should have a date,
mood selector (5 moods from great to terrible with emoji), and a text area for
writing. Show a mood timeline chart across days. Include a search function to find
old entries. Clean minimal design. Store in browser storage.
```

---

05 Bookmark Manager

Save links with notes and categories — your own organized reading list beyond browser bookmarks.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a bookmark manager as a single HTML file. I want to save URLs with a title,
short note, and category tags. Show bookmarks as cards organized by category.
Include search and filter by tag. Add a "read later" vs "read" status toggle. Modern
card-based UI. Store in browser storage.
```

BUSINESS & WORK

Business & Work

06 Client Invoice Generator

Generate professional PDF invoices with your business details, line items, tax calculations, and payment terms.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build an invoice generator as a single HTML file. I want to enter my business name, client details, line items (description, quantity, rate), tax rate, and payment terms. It should calculate totals automatically and generate a clean, professional invoice I can print or save as PDF. Include invoice numbering.
```

07 Meeting Notes Template System

A structured template for capturing meeting notes with attendees, action items, and follow-ups in one place.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a meeting notes app as a single HTML file. Each meeting entry should have: date, title, attendees list, agenda items, notes section, action items (with who and deadline), and decisions made. Let me create new meetings from a template and browse past meetings. Export individual meetings as text. Store in browser.
```

08 Simple CRM (Contact Manager)

Keep track of your clients and contacts with notes, last contact date, and follow-up reminders.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a simple CRM as a single HTML file. I want to add contacts with: name, email, phone, company, category (lead/client/partner), notes, and last contact date. Show contacts as a sortable table with search. Highlight contacts I haven't reached out to in 30+ days. Include an "add interaction" log for each contact. Store in browser.
```

09 Project Proposal Template

A fill-in-the-blanks proposal builder that outputs a polished, professional document ready to send to clients.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a project proposal builder as a single HTML file. I fill in: project name, client name, project description, scope items, timeline milestones, pricing table, and terms. It generates a polished, printable proposal document with professional formatting. Include my business name field in the header. Make it look premium.
```

---

10 Time Tracker for Freelancers

Track billable hours per project and client, then generate simple reports for invoicing.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a freelancer time tracker as a single HTML file. I want to create projects (with client name and hourly rate), then start/stop a timer or manually add time entries. Show total hours and earnings per project. Include a weekly summary view and ability to export a timesheet report. Store in browser storage.
```

Websites & Landing Pages

11 Personal Portfolio Site

A professional single-page portfolio to showcase your work, skills, and contact information.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build me a personal portfolio website as a single HTML file. Include sections: hero with name and tagline, about me, skills/services (show as cards), portfolio/work samples (image grid with modal), testimonials, and contact form. Make it responsive, modern, and professional with smooth scroll navigation. Use a dark theme with green (#00C896) accents.
```

12 Product Landing Page

A conversion-focused landing page for a product or service with all the essential sections.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a product landing page as a single HTML file. Include: hero section with headline and CTA button, feature highlights (3-4 features with icons), how it works (3 steps), pricing section with 2-3 tiers, testimonials carousel, FAQ accordion, and footer with links. Make it modern, responsive, and conversion-focused. I'll fill in my own content later — use placeholder text.
```

13 Event Countdown Page

A countdown timer page for a launch, event, or promotion with email signup.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build an event countdown page as a single HTML file. Show a large animated countdown timer (days, hours, minutes, seconds). Include an event title, short description, date, and an email signup form. Add particle or confetti animation in the background. Make it dramatic and exciting. Let me easily change the target date in the code.
```

14 Restaurant / Cafe Menu Page

A beautiful, mobile-friendly digital menu page for a food business.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a restaurant menu website as a single HTML file. Include sections for
appetizers, mains, desserts, and drinks. Each item has a name, description, price,
and optional "popular" or "new" badge. Add a filter by dietary tag (vegetarian,
gluten-free, spicy). Make it elegant and mobile-first with a warm color scheme. Use
placeholder items.
```

---

15 Link-in-Bio Page

Your own customizable link-in-bio page — like Linktree, but fully yours.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a link-in-bio page as a single HTML file. Show a profile photo placeholder,
name, short bio, and a vertical stack of customizable link buttons. Each button has
an icon, label, and URL. Add social media icon links at the bottom. Make it
mobile-first, clean, and stylish with rounded buttons and subtle hover animations.
Let me easily edit links in the code.
```

CONTENT & WRITING

Content & Writing

16 Blog Post Outline Generator

Enter a topic and get a structured blog outline with sections, key points, and suggested hooks.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a blog outline generator as a single HTML file. I enter a blog topic and
target audience. It uses a smart template to generate: a headline, hook intro, 4-6
main sections with subpoints, a conclusion, and CTA suggestion. Show the outline in
a clean format I can copy. Include options for blog style (how-to, listicle,
opinion, case study).
```

17 Social Media Post Scheduler Board

Plan and organize your social media content on a visual weekly calendar board.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a social media content planner as a single HTML file. Show a weekly calendar
grid. I can add posts to each day with: platform (Instagram, Twitter, LinkedIn,
TikTok), post text, status (draft/scheduled/published), and content type (image,
video, text, carousel). Color-code by platform. Let me drag and drop between days.
Store in browser.
```

18 Email Subject Line Tester

Enter email subject lines and get scored on length, power words, personalization, and urgency.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build an email subject line tester as a single HTML file. I paste in a subject line
and it scores it on: character count (ideal 30-50), word count, use of power words,
presence of numbers, personalization tokens, urgency words, and spam trigger words.
Show a score out of 100 with a visual gauge and specific improvement tips. Let me
test multiple lines and compare scores.
```

19 Content Repurposer Worksheet

Paste in a blog post and get a structured worksheet for turning it into multiple content formats.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a content repurposer tool as a single HTML file. I paste in a long-form blog post. It generates a structured worksheet showing how to turn it into: 5 tweet threads, 3 LinkedIn posts, 1 email newsletter, 1 Instagram carousel outline, and 3 short-form video scripts. Each format has a template with character limits and best practices. Clean, printable layout.
```

---

20 Writing Prompt Generator

Get random creative writing prompts by genre for daily writing practice or content brainstorming.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a writing prompt generator as a single HTML file. Include categories: fiction, business content, personal essay, copywriting, social media, and poetry. When I click "generate," show a random prompt from the selected category with a brief constraint (word count, style, audience). Include a "save favorites" feature. Add at least 20 prompts per category. Make it playful and inspiring.
```

DATA & PRODUCTIVITY

Data & Productivity

21 CSV Data Visualizer

Upload a CSV file and instantly see your data as interactive charts and summary statistics.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a CSV data visualizer as a single HTML file. I drag-and-drop or upload a CSV file. It should: detect columns and data types, show a preview table, let me pick X and Y axes, and generate bar charts, line charts, and pie charts. Include basic stats (count, average, min, max) per column. Use Chart.js for charts. Clean dashboard layout.
```

22 Pomodoro Timer with Stats

A focused work timer using the Pomodoro technique, with session tracking and daily productivity stats.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a Pomodoro timer as a single HTML file. Standard 25-min work / 5-min break / 15-min long break after 4 sessions. Show a large circular countdown timer with smooth animation. Track completed sessions per day and show a bar chart of daily productivity over the past week. Play a sound when time's up. Add a task label for each session. Store history in browser.
```

23 Kanban Task Board

A drag-and-drop task board with columns for organizing your work visually — like a simple Trello.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a Kanban board as a single HTML file. Default columns: To Do, In Progress, Review, Done. I can add cards with a title, description, priority (low/medium/high colored), and due date. Cards are draggable between columns. Include an "add column" option. Show total cards per column. Clean, minimal design with subtle shadows. Store in browser storage.
```

24 Weekly Planner / Agenda

A printable weekly planner with time blocks, priorities, and notes sections for each day.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a weekly planner as a single HTML file. Show a 7-day grid with hourly time blocks (7 AM to 9 PM). I can click a block to add an event/task with a title and color category. Include a weekly goals section and a notes area. Make it look beautiful when printed (print-optimized CSS). Include a "clear week" and "this week" date navigation.
```

---

25 Password Generator & Strength Checker

Generate strong passwords with custom rules and check existing passwords for strength.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a password tool as a single HTML file. Two modes: Generate (choose length, include uppercase, lowercase, numbers, symbols, exclude ambiguous characters) and Check (paste a password to see strength score). Show strength as a color bar with rating. Display estimated crack time. Add a copy-to-clipboard button. Generate 5 passwords at once for easy picking. Modern, clean UI.
```

EDUCATION & LEARNING

Education & Learning

26 Flashcard Study App

Create and study flashcard decks with a spaced repetition system to boost your memory.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a flashcard study app as a single HTML file. I can create decks with cards (front/back). Study mode shows the front, I flip to reveal the answer, then rate difficulty (easy/medium/hard). It uses a simple spaced repetition system — hard cards appear more often. Show progress stats per deck. Add import/export as JSON. Smooth flip animations. Store in browser.
```

27 Quiz Builder

Create multiple-choice quizzes with scoring, explanations, and a results summary.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a quiz builder as a single HTML file. I can create quizzes with multiple-choice questions (2-4 options, mark correct answer, add explanation). Quiz mode presents questions one at a time with a progress bar. After completing, show score, time taken, and review each question with correct/wrong indication and explanations. Store quizzes in browser. Include a sample quiz.
```

28 Language Vocabulary Trainer

Practice vocabulary in any language with word lists, definitions, and a testing mode.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a vocabulary trainer as a single HTML file. I add word pairs (word in target language + translation + optional example sentence). Practice modes: flashcard flip, type-the-answer, and multiple-choice. Track mastery level per word (new/learning/mastered). Show overall progress. Support any language pair. Include an import function for word lists. Store in browser.
```

29 Typing Speed Test

Test and improve your typing speed with real-time WPM tracking and accuracy stats.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a typing speed test as a single HTML file. Show a paragraph of text and track my typing in real time. Highlight correct characters in green, mistakes in red. When done, show WPM (words per minute), accuracy percentage, and common mistakes. Include difficulty levels (easy, medium, hard) with different text. Save best scores. Include a 60-second timed mode.
```

---

30 Math Practice Worksheet Generator

Generate randomized math practice sheets for any skill level — great for kids or self-study.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a math worksheet generator as a single HTML file. Choose operation (addition, subtraction, multiplication, division, mixed), difficulty (single digit, double digit, triple digit), and number of problems (10, 20, 50). Generate random problems with an answer key. Include a "practice mode" where I type answers and get instant feedback. Make the worksheet printable. Add a timer for timed challenges.
```

CALCULATORS & UTILITIES

Calculators & Utilities

31 Mortgage / Loan Calculator

Calculate monthly payments, total interest, and view an amortization schedule for any loan.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a loan calculator as a single HTML file. Inputs: loan amount, interest rate, loan term (years), and start date. Show: monthly payment, total interest paid, total amount paid. Generate a full amortization schedule table showing each month's payment, principal, interest, and remaining balance. Include a chart showing principal vs interest over time. Clean financial design.
```

32 Unit Converter

Convert between common units — length, weight, temperature, volume, speed, and more.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a unit converter as a single HTML file. Categories: length, weight, temperature, volume, area, speed, data storage, time. Each category has relevant units. Two-way conversion: type in either field and the other updates instantly. Show the conversion formula used. Make it fast, clean, and easy to switch categories. Include a "swap" button to flip units. Mobile-friendly design.
```

33 Tip Calculator / Bill Splitter

Split restaurant bills with custom tip percentage and uneven splitting options.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a tip calculator and bill splitter as a single HTML file. Enter bill amount and tip percentage (with quick buttons for 15%, 18%, 20%, 25%). Split evenly between 1-20 people. Show per-person total. Advanced mode: add individual items and assign them to people for uneven splitting. Show a summary breakdown for each person. Large, touch-friendly buttons for mobile use.
```

34 Color Palette Generator

Generate beautiful color palettes for your projects with hex codes, RGB values, and contrast checking.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a color palette generator as a single HTML file. Features: pick a base color
and generate harmonious palettes (complementary, analogous, triadic, monochromatic).
Show 5 colors per palette with hex and RGB values. Click to copy any color code.
Include a contrast checker (WCAG AA/AAA) for text readability. Generate random
palettes too. Display colors as large swatches. Let me save favorite palettes.
```

---

35 Savings Goal Tracker

Set a savings goal, log contributions, and watch your progress with a visual tracker.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a savings goal tracker as a single HTML file. Set a goal (name and target
amount). Log savings contributions with date and amount. Show progress as a visual
filling bar or thermometer with percentage. Display projected completion date based
on average savings rate. Support multiple goals at once. Show a line chart of
cumulative savings over time. Store in browser.
```

CREATIVE PROJECTS

Creative Projects

36 Meme Generator

Upload an image and add top/bottom text to create shareable memes in seconds.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a meme generator as a single HTML file. I can upload an image (or paste a URL), then add top text and bottom text with classic meme font (Impact, white with black outline). Let me adjust font size and text position. Preview live. Include a "download" button to save the meme as an image. Add some popular meme templates as starting options. Fun, playful UI.
```

37 Pixel Art Editor

Draw pixel art on a customizable grid with a simple, fun drawing tool.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a pixel art editor as a single HTML file. Features: adjustable grid size (8x8 to 64x64), color picker, eraser, fill bucket, and undo. Click or drag to paint pixels. Include a palette of 16 common pixel art colors. Export as PNG. Add a gallery to save creations in browser storage. Show a mini-preview at actual size next to the grid. Fun, retro-styled UI.
```

38 Mood Board Builder

Create visual mood boards by arranging colors, text snippets, and notes on a freeform canvas.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a mood board builder as a single HTML file. A freeform canvas where I can add: color swatches (pick any color), text blocks (with font and size options), sticky notes, and dividers. All elements are draggable and resizable. Include a selection of aesthetic background textures. Export the board as an image. Save boards in browser. Clean, Pinterest-inspired design.
```

39 ASCII Art Generator

Convert text into large ASCII art banners using various font styles.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create an ASCII art text generator as a single HTML file. I type text and it converts it into large ASCII art letters. Include at least 5 different ASCII font styles to choose from. Show a live preview as I type. Add a copy-to-clipboard button. Also include a simple drawing mode where I can "paint" with ASCII characters on a text grid. Retro terminal-style UI with green-on-black theme.
```

---

40 Random Name / Idea Generator

Generate random business names, project names, usernames, or creative ideas from customizable word lists.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a random name generator as a single HTML file. Modes: business name, project codename, username, fantasy character name, and startup idea. Each mode combines different word lists to create names. Generate 10 results at a time. Let me favorite and save names. Include filters (style: professional, playful, techy, elegant). Add a "mix" mode that combines two words. Copy any result with one click.
```

HEALTH & LIFESTYLE

Health & Lifestyle

41 Workout Planner

Build custom workout routines with exercise lists, sets, reps, and a visual timer.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a workout planner as a single HTML file. I can create workouts with exercises
(name, sets, reps, rest time). Include a library of common exercises by category
(upper body, lower body, core, cardio). During a workout, show each exercise with a
rest timer between sets. Track completed workouts with a calendar view. Include
preset beginner routines. Store in browser.
```

42 Water Intake Tracker

Track daily water consumption with a visual glass-filling animation and daily goal progress.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a water intake tracker as a single HTML file. Set a daily goal (in glasses or
liters). Tap a button to log each glass of water. Show progress as an animated water
level filling up a bottle graphic. Display weekly history as a bar chart. Send a
visual reminder if I'm behind pace. Reset daily at midnight. Fun, refreshing
blue-themed design. Store in browser.
```

43 Meal Prep Planner

Plan your weekly meals and automatically generate a combined grocery shopping list.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a meal prep planner as a single HTML file. A weekly grid (Mon-Sun) with
breakfast, lunch, dinner, and snack slots. I can add meals to each slot with a name
and ingredients list. A "generate shopping list" button combines all ingredients,
merges duplicates, and organizes by grocery store section (produce, dairy, meat,
pantry, etc). Include a print-friendly shopping list. Store in browser.
```

44 Sleep Log & Analyzer

Log your sleep times and wake times, then see patterns and averages in your sleep data.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a sleep logger as a single HTML file. I log bedtime, wake time, and sleep quality (1-5 stars). It calculates sleep duration automatically. Show a dashboard with: average sleep duration (weekly/monthly), sleep quality trend line chart, best and worst sleep days, and a timeline visualization of sleep/wake patterns. Include tips based on my patterns. Store in browser.
```

---

45 Gratitude Journal

A simple, beautiful daily gratitude practice tool — write three things you're grateful for each day.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a gratitude journal as a single HTML file. Each day I write 3 things I'm grateful for. Show a calendar view where completed days are highlighted. Include an "on this day" feature showing past entries from the same date. Display a streak counter and total entries. Make it beautiful, warm, and calming with soft colors and gentle animations. Include a random past entry "memory" feature. Store in browser.
```

GAMES & FUN

Games & Fun

46 Trivia Quiz Game

A multiplayer-ready trivia game with categories, scoring, and a leaderboard.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a trivia quiz game as a single HTML file. Include at least 50 questions across 5 categories (science, history, geography, pop culture, technology). 4 answer options per question with a 15-second timer. Track score and show a leaderboard. Add visual feedback for correct/wrong answers. Include single player and pass-and-play multiplayer modes. Fun, game-show-style design with animations.
```

47 Memory Card Game

The classic card-matching memory game with different difficulty levels and move counters.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create a memory card game as a single HTML file. Grid of face-down cards — flip two at a time to find matching pairs. Difficulty levels: easy (4x3), medium (4x4), hard (6x5). Use emoji as card faces. Track moves, time, and best score. Include a smooth flip animation and match celebration animation. Show a win screen with stats. Store best scores in browser. Playful, colorful design.
```

48 Word Scramble Game

Unscramble jumbled words against the clock — a quick, fun vocabulary challenge.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a word scramble game as a single HTML file. Show a scrambled word and I have to type the correct word. Include 100+ words across difficulty levels (easy 4-5 letters, medium 6-7, hard 8+). 30-second timer per word. Score based on speed and streak. Include a hint system (reveals one letter, costs points). Show letters as draggable tiles I can rearrange. Track high score. Fun arcade-style design.
```

49 Snake Game

The classic Snake game — eat food, grow longer, don't hit yourself or the walls.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Create the classic Snake game as a single HTML file. Arrow keys to move, eat food to grow, avoid walls and yourself. Include: score display, high score tracking, 3 speed levels, a pause button, and a game-over screen with restart. Make the snake smooth (not choppy). Add subtle particle effects when eating food. Retro neon green theme on dark background. Touch controls for mobile.
```

---

50 Spin the Wheel Decision Maker

Add options to a customizable spinning wheel and let fate decide — great for team games or decisions.

■ COPY-PASTE THIS PROMPT INTO CLAUDE CODE:

```
Build a spin-the-wheel app as a single HTML file. I add options (text entries) to the wheel. Click to spin with a realistic spinning animation and gradual slowdown. Show the result with a celebration animation. Each slice gets a random color. Let me save preset wheels (lunch spots, team names, activities). Include a "remove winner" option for elimination rounds. Fun, carnival-style design. Store in browser.
```

Bonus: Power Tips

1. Start Simple, Then Expand
Build the basic version first. Once it works, ask Claude Code to add features one at a time. "Now add dark mode" or "Now add the ability to export as PDF."

2. Be Specific About Design
The more detail you give about how you want things to look, the better the result. Mention colors, layout preferences, and inspiration sites.

3. Use the WHAT-WHERE-HOW-VERIFY Formula
Structure your prompts: WHAT you want built, WHERE it should go (single file, folder structure), HOW it should look and behave, and ask Claude Code to VERIFY it works.

4. Save Your Work
After Claude Code creates a project, save the files somewhere safe. You can always come back and ask Claude Code to improve it later.

5. Combine Projects
Once you're comfortable, try combining ideas: a budget tracker WITH a savings goal visualizer, or a portfolio site WITH a blog. The possibilities are endless.

6. Ask for Explanations
If you want to learn, ask Claude Code: "Explain how this code works in simple terms." It'll walk you through what it built and why.

7. Iterate and Improve
Your first version won't be perfect — and that's fine. Tell Claude Code what to change: "The button is too small", "Move the chart to the right", "Make the font bigger."

8. Mobile First
If you're building something you'll use on your phone, add "Make it mobile-first and responsive" to any prompt. Claude Code will optimize for small screens.

What's Next?

You now have **50 projects** ready to build. But this is just the beginning.

1. Pick 3 Projects This Week
Don't try to build all 50 at once. Choose three that excite you the most and start there.

2. Customize Everything
Once a project is built, make it yours. Change the colors, add your content, tweak the layout.

3. Show Your Work
Built something cool? Share it! Deploy your websites, show your tools to friends, use your trackers daily.

4. Go Beyond the Prompts
As you get comfortable, start writing your own prompts from scratch. You'll be surprised how creative you can get.

5. Continue the Course
Your next lessons in the course dive deeper into Claude Code's advanced features. Keep going!

Happy building!
